Phytrex Launches Apple HomeKit WiFi SDK/Module, WACIO and WACDNA at COMPUTEX

Taipei, Taiwan---Phytrex announced two HomeKit development tools (Phytrex WACIO, Phytrex WACDNA) and solutions (photo below) in 2016 Taipei Computex...

With the WACIO SDK, Phytrex is now able to offer smart appliance and IoT hardware makers a full HomeKit implementation as well as feature and design guidance for their app. The WACIO SDK is a full end-to-end solution that meets all technical specifications and can incorporate Wi-Fi chipsets such as those Apple vendors.

HomeKit offers a set of common protocols making it easier for customers to control HomeKit-enabled accessories using Siri or third-party apps. HomeKit is built on a secure foundation with end-to-end encryption which provides customers a secure connection between their iPhone, iPad or iPod touch and HomeKit-enabled accessory.

"Apple HomeKit is leading the way to let houses become smarter than ever,"said Phytrex North America sales head. "We look forward to helping hardware makers bring their HomeKit-enabled accessories and appliances to market and get this exciting new technology into the hands of millions of consumers."

The HomeKit-enabled WACIO SDK, along with its all-in-one, turn-key solution and reference implementations, comprise the complete Phytrex IoT portfolio. Through Phytrex's exclusive Easy-Stack SDK flow, IoT hardware makers are able to significantly
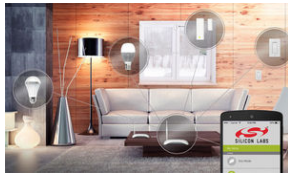

shorten the product development cycle for at least three months and expedite the product launch.

Phytrex, with its WACIO SDK, has been supporting multiple customers everywhere Ongoing projects include HomeKit-enabled air conditioners from the World number one air conditioner makers, and various projects on Smart Plugs and Smart Lighting in Europe and America. The upcoming products will hit the market later on.
